Project Learning Tree (PLT) uses trees and forests as a window to the natural and built world around us. Helping youth connect to the environment can lead to future stewardship activities, but research shows that building critical thinking skills and increasing environmental literacy can help solidify these relationships. This PLT workshop will introduce participants to the flagship K-8 Activity Guide through active engagement, implementation variations, and discussion. Participants will also be introduced to the PLT/BSA correlations to Cub Scout Adventures and BSA Merit Badges. Every participant will leave with their own copy of the 400+ page PLT activity guides and additional resources. Course fee includes lunch only.

You do NOT have to be registered to attend the 2020 National Outdoor Ethics Conference. If you are not attending the main conference, please bring a cup/water bottle to use during the day.

Not familiar with PLT, check them out at https://www.plt.org/about-us/.

Workshop Date: Tuesday, November 10th

Workshop Time: 9:00 AM – 4:00 PM

Workshop Location: Sullivan Training Center Classroom and Outdoors
