*“We must safeguard these magnificent natural wonders so that future generations may also draw strength and inspiration from the handiwork of the Master Creator.” – Gordon B. Hinckley*

This internationally-recognized course is the top tier of Leave No Trace training and provides participants with an in-depth look at the skills and ethics of Leave No Trace. In addition to practical applications of Leave No Trace in the field, participants will also learn about various teaching styles and effective communication techniques. Graduates are qualified to teach Leave no Trace Trainer Courses, Awareness Courses, and teach at other venues.

### Course Options

**Trek Option:** Needs a minimum of 6 participants to run. Participants will join the non-trek course for 2 days and then spend 4 days and 3 nights backpacking in the High Uintas Wilderness for the field experience portion of their training.

**Non-Trek Option:** Need a minimum of 6 participants. Participants will be combined with the Trek course for 2 days and then camp in a primitive area for their 4 day, 3 night field experience. This option does not require hiking.

**Both options MUST fill if each one is to run. The default is non-trek if not enough people sign up for the trek option.**

Portions of the course will take place at the world-class training facility in the Monson Lodge at Hinckley Scout Ranch.

Leave No Trace is needed now more than ever as we strive to be better stewards of the great outdoors and build bridges in our communities.

**Prior Leave No Trace Training is recommended but not required to participate in the Master Educator Course.**
